

## ABSTRACT

The invention relates to a method for soldering an  
5 object comprising several soldered joints, which method  
comprises the steps of mechanically soldering of at least  
some of the soldered joints, visually assessing the soldered  
joints, and correctively soldering the visually assessed  
soldered joints that do not meet the relevant quality  
10 requirements, wherein said visual assessment takes place by  
means of a video camera and a computing device connected to  
the video camera, in which computing device the assessment  
criteria for the soldered joints are stored.

The invention also relates to an apparatus for carrying  
15 out such a method.
